

# PointCare - Split Screen/Pop-Up Screen Options - Two Applications Displayed Side by Side

Last Modified on 10/14/2024 9:10 am EDT

## Policy:

## Purpose:

Used when performing medication reconciliation, viewing the History and Physical to address Past Medical History, or leveraging Knowledge Base (KB) for guidance/instruction while completing a visit.

**Regulation:** 

## Measurement:

1.

### Process:

1. On the bottom of the screen, select the three vertical lines to view all open and active applications.

2. Each open window has an icon above the screen. Click on the icon for the drop-down menu of options.

- 2. Click on the three dots for options of how the split view should be displayed.
  - 1. This icon stacks (top and bottom) the windows on top of each other instead of side by side.

ľ	(	)	

2. This icon moves the screens to the opposite sides (Right to Left)

3. This icon saves the pair as an option to choose.

# (

3. Click on the three dots for options of how the top/bottom windows should be displayed.

1. This icon changes the view back to Right/Left view instead of stacked (top and bottom).

()

2. This moves the top screen to the bottom screen.

3. When open in "Pop-Up" view, here are the options that appear.

1. This will change the view back to split screen.

2. This will change the transparency of the "Pop-Up" screen so you can see the screen behind it.

Ð

3. This will change the "Pop-Up" screen to an icon moved to the corner.

4. This will undo the split screen.

5. This will move the window it is on out of your current view.

 $\times$ 

### 4. Lock this app.

- 1. This will keep the app as an option on your display.
- 2. The app will not be able to be closed without unlocking it so you cannot accidentally close an app needing to be open.
